48)	Four : SWA, Ostafrika, Togo, Kamerun	1 to 3
49)	Réunion	1
50)	(discussion, vote Yes or No)	(1?)

TOTAL 71 to 74

Note to 37 a):

The original self-adhesives were the brainchild of two philatelic entrepreneurs -- Mr Derek Worboys and Mr John Daynes who both submitted orders for these Machin octagonal die-stamped designs to Her Majesty's Stationery Office to be produced on self-adhesive paper. These stamps were produced in late 1973 just prior to this special service being withdrawn. The 1st Series was duly issued on **February 10th 1974**, which was the exact date of the 10th Anniversary of the sierra Leone self-adhesive Issue." (note): Sierra Leone was the first country in the world to issue self-adhesive stamps and did so in 1964.)

Series 1 consists of five values -- ½p (light blue), 1p (crimson or maroon), 1½p (grey-black), 5½p (a se-tenant 5p light violet value with a ½p light blue) and 8p (a se-tenant 5p with 3p).

SG 1789 - **19th Oct 1993** - 1st Class orange-red Self-Adhesive. 2 phosphor bands. Perf 14 x 15 and one elliptical hole on each vertical side. Initially sold at 24p but increased to 25p from 1 Nov 1993. Only issued in booklets containing 20 stamps - SG MG1 (£4.80 - £5).

GB goes self-adhesive

"On **January 29, 2001**, Royal Mail begins a massive transition to self-adhesive stamps. Although countries such as the United States have been issuing large quantities of self-adhesive stamps for the last few years, Great Britain has released only a few trial issues. That situation is about to change....." (From gbstamps.com website)
